

INFORMED CHOICES ABOUT

DEPRESSION

Hosting fact sheets or web links

We encourage health professionals to use the resources developed by the Mobilizing Minds Research Group and to post them on their websites so that both clients and other professionals may access the information when it is required.

Individual PDF fact sheets can be conveniently posted on your website using the URLs below, in a way that allows visitors to view, print or save them without being directed away from your website. By using these URLs on your site, rather than setting up the fact sheets you want with new URLs, you will also help us to monitor how many people are accessing these resources, so that we may report this to the project funders (the Canadian Institutes for Health Research and the Mental Health Commission of Canada). The exact way that the links are posted will depend on the content management system (CMS) or framework (CMF) your website uses, so you may require the assistance of your website developer or administrator.

If you have any questions about this process, or are interested in hosting the Mind Pack or any of Mobilizing Minds' research snapshots or publications, please contact Mobilizing Minds Research Lead, Dr. John Walker at john.walker@umanitoba.ca
